

MATRIX[®]

METALLIC

METALLIC PNEUMATIC FOILING SYSTEM

Matrix[®] Metallic[™] Enables Digital Foil and Spot UV Type Effects on Wider Range of Papers

▲ MX-370MP

Design

The new Matrix Metallic[™] has been designed specifically for applying digital foils and spot-UV type effects easily and economically to a wide range of paper stocks.

Like its Matrix stablemates, the Matrix Metallic[™] features pneumatic rollers with thermostatic temperature control. The heavy, even pressure it can apply coupled with precise heat ensures excellent results and minimises wastage. The easy to operate Metallic[™] has been fully optimised to work better with uncoated papers, widening the choice of creative papers that can be used with digital foiling.

The Matrix Metallic[™] is a modular system which means that, for example, it is fully compatible with the retrofittable Matrix Omniflow[™] Deep Pile Feeder. The feeder allows ~700 sheets of paper to be stacked to feed automatically into the Matrix, speeding up production time and freeing up an operator to work on other jobs.

Specifications

	MX-370P
Max. Mechanical Speed (m/ft/min)	10m/33ft
Max. Lamination Film Width (mm/inches)	340mm/13"
Paper Thickness (gsm/lbs)	135gsm +/90lbs +
Maximum Sheet Width (mm/inches)	420mm/17"
Warm-up Time (mins)	10
Temperature Range (°C/°F)	0-140°C/32-284°F
Power Supply (V)	220/240
Power Supply Required (Amps)	13
Power Consumption (W)	2200
Overall Dimensions (mm/inches)	800x1800x1400mm/31x71x55"
Gross Machine Weight (Kg/lbs)	280Kg/617lbs
Warranty*	1 year

Reverse Mode

Speed Control

KEY FEATURES

- Pneumatic pressure
- Easy-to-use control panel
- Anti-curl technology
- Semi-automatic feed
- Automatic separator
- Enables foiling on a wider range of stocks

GREAT FOR USE IN

- Commercial printers
- Digital printers
- Copy and print shops

IDEALLY SUITED FOR

- Business cards
- Menus
- Book covers
- Brochures
- Flyers

and many more...
